## **NEWHOUSE BUYS** NORTH BINGHAM

Property Is to Be Systematically Opened by His Engineer.

WORKING AT ZINC PLANT

Newhouse is 50 prominently identified—it is a personal undertaking, pure and simple, and places him in precisely the same position as that occupied by any other prospector in that end of the camp, where he hopes to be able to make a mine. His presence there will stimulate every other property owner in the north end and it will be strange if the section does not turn out well. It has been a matter of belief for years past that if some one with means would get in there and do something in a substantial way big results would follow.

That something will be done is evidenced by the fact that the opening and demonstration of the worth of the ground has been placed in the hands of M. M. Johnson, the man who brought out the Highland Boy, Boston Consolidated and Newhouse miner in Berner. dated and Newhouse mines in Beaver county. Active work will begin just as soon as Mr. Johnson can have some surveying done and marshal his forces and, before the close of the present year, it is expected that he will have learned things about the ground that the old owners never dreamed existed.

## ANNIE LAURIE EXTENSION.

## Drifting for a Pay Shoot in Ledge Now Under Way,

L. H. Outzen, manager of the Annie Laurie Extension company's property in the Gold Mountain district, came up from the south yesterday and today he will leave for the St. Louis head-

he will leave for the St. Louis head-quarters of the company, to be gone several days. Asked how the mine was looking Mr. Outzen said:

"You had the news awhile ago that the ledge had been reached by the tun-nel. Since then we have cross-cut to the foot wall and found the vein to be twenty feet wide. We are now drift-ing for a pay shoot, something we did not find at the point where the vein was tapped. The quartz is all good and lively and some values have been mak-ing in it, but there is nothing yet to get excited over. We are in just about the same condition that P. L. Kimerley was after he had spent \$20,000 in the Annie Laurie. He had a good mind Annie Laurie. He had a good mind to give the proposition up, but, finally decided to try it a little longer. After the first strike was made ore kept coming in and it was not long till a change of sentiment regarding the value of the property was brought about. Now we all know what the mine is. It would take several millions to induce the present owners to part with it. I believe that the Annie Laurie Extension ground is just as good as the Extension ground is just as good as the Annie Laurie and I hope to give the first evidence that my belief is well founded very soon."

## BREAKING GROUND FOR MILL.

## Material Is Arriving and Work Is Started at Zinc Works.

With a crew of men preparing the With a crew of men preparing the ground for the erection of buildings, with six carloads of material standing in the railroad yards and switches building from both the Short Line and Rio Grande tracks, the grounds of the Western Ore Separating company in the northwest portion of town, where the new mill is to be built, are on the eve of presenting a most animated appearance.

It was stated yesterday that the buildings would be completed within sixty days, and by that time machinery sixty days, and by that time machinery and equipment will be arriving at such a pace that a few weeks more will be all that is required to get the works in shape to run. While this company is capitalized for only \$50,000, it is an open secret that the plant going up will cost more than \$150,000, and that without figuring at all on what the company will undoubtedly make of it within a year or so after it has been started. By August the company will be ready to begin the handling of zinc ore.

months immediately preceding the issuance of such obligations.

Except the interest on \$561,000 bonds of an old issue, which will soon be retired, the American Smelting & Refining Co. has no charge ahead of its capital stock other than that arising on the guaranty of the \$30,000,000 of preferred stock, series B, of the American Smelters Securities Co, now to be issued. Thus this guaranty is practically the only fixed charge ahead of the capital stock of the American Smelting & Refining Co., which consists of \$50,000,000 of common and \$50,000,000.

## Samuel Newhouse's Mine Manager

A wagon load of fine looking copper ore from the Copper Queen property at Lida arrived in town last Tuesday and has been placed on exhibition at the office of the Goldfield Consolidated Mining & Power company, says the Goldfield News. This company is the owner of the Copper Queen claim, having completed the purchase of the same about one week ago. The ledge, which outcrops on the surface, has been proved for a distance of 300 feet.

The ore brought to town came from a surface where the ledge shows a width of about six feet. Several samples taken from the ore gave assay returns of from 15 to 45 per cent copper, a little over \$50 gold and about 8 ounces silver per ton. The company has a force of men at work on the property and it is announced that a fifty-ton trial shipment will be made next week. It is the purpose of the management to determine the average value of the ore body, and with this end in view will send out a fifty-ton trial sampler.

## Park Mining Notes.

Park City. May 4.—The work of cleaning up at the Naildriver mine is being pushed quite rapidly, and as soon as this is done the mine will open again in full force and the usual number of men will be employed.

The Silver King Consolidated is again in running shape and a large force of men are being hired by the company.

## Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$\$5,900, as follows: Silver, lead, gold and copper ores, \$\$2,500; base bullion, \$27,800; gold bars, \$\$9,600.

## Metal Markets.

## Mining Notes.

The Uncle Sam Consolidated company nad four cars of crude ore and four ars of concentrates at the sampler yes-

the mine.

The Pioneer sampler yesterday reported two cars of ore from Tintic, one from Bingham, one from Alta and one

from Idaho.

Ore receipts at the Taylor & Brunton sampling works yesterday included seven cars from Nevada, five from Tintic and one from Bingham.

Manager John Dern, of the Uncle Sam and Lower Mammoth properties, is back from a trip of inspection to the mines of those companies very much encouraged over conditions. While at camp he got into a big storm and caught a cold which is most aggravating in its severity.

of this liquidation and the motive for it the indications were not so clear and the elements of mystery were made the Wabash 200 Wabash 800 stock market operators, according to the habit of that class. It was a fair inference that the liquidation was of a concentrated character and represented the closing out of some large and important according to the closing out of some large and important according to the closing out of some large and important according to the closing out of some large and important according to the closing out of some large and important according to the closing out of some large and important according to the closing out of some large and important according to the closing to the class of the closing out of some large and important according to the closing out of some large and important according to the class of the class o

March activity and the rate of expansion after railroad earnings is therefore not so rapid. The northwestern railroad situation seems to be still the most immediate factor in the stock market as it has been ever since the 15-point break in Northern Securities stock on the day the supreme court is sued its mandate for the dissolution of the company, which was the date of the beginning of the present decline in stocks.

which brought him his fortune, and by and by he promises to be heard from again, as his ground is considered very valuable.

A. J. Bettles, of the Newhouse staff, will leave for Bingham today to size up the big porphyry deposits of the Boston Consolidated and incidentally call upon Superintendent Frank B. Janney at the Utah Copper plant and note the manner in which the copper is king there washed from the ore.

Secretary W. P. O'Meara yesterday received word from the superintendent of the Nevada-Alpine bonanza that a fine body of ore had been encountered in incline No. I. north of cross-cut No. 2, at a depth of more than 250 feet from the surface in that property. The strike is significant. Mr. O'Meara explained, as demonstrating that the ore bodies in the mine were going to the deep.

A brief wire from San Francisco to James A. Pollock & Co. yesterday brought the information that the Tonopah-Home company had gone into the hands of a receiver. It is thought that the consolidation with the Mizpah Extension has resulted in some of the minority shareholders of the Home company making a kick and getting a receiver appointed.

San Bernardino Times-Index: Mark

A brief wire from San Francisco to James A. Pollock & Co. yesterday brought the information that the Tonopah-Home company had gone into the hands of a receiver. It is thought that the consolidation with the Mizpah Extension has resulted in some of the minority shareholders of the Home company making a kick and getting a receiver appointed.

San Bernardino Times-Index: Mark Brown has come back from a trip to the desert with a report that Pat Monahan and his partner have struck a richledge of quartz near Kelso, on the Salt Lake route. The ledge, which was found about four weeks ago, is seven feet wide, and a carload of the ore, weighing 26 tons, which has just been sen to San Hrancisco, brought from \$104 to \$120 per ton, this being the first shipment from the mine.

# . 66,600 1391/2 138 inference that the liquidation was of a concentrated character and represented the closing out of some large and important accounts held by a few individuals, presumably also of power and resources in the financial world. The fact of liquidation of this character taking place was of decisive effect on sentiment. It was supposed that very large holdings which had been withheld from the market during the demoralization of Saturday and Monday were now being pressed for sale to take advantage of the revived strength of prices. This very evident liquidation disappointed the hope that most important selling had been completed and that the worst to be looked for was a dull and sluggish market. Confidence in the general situation is still professed in a large degree but the renewed weakness in stocks today caused some question of possible developments in the general situation sill to be revealed to the general public. Iron and steel trade reports disclose the fact that the rate of production in that trade is at length overtaking the steel expanding consumption and price conditions as a consequence are not firm. Rallroad traffic officials admit a falling off from the high level of the March activity and the rate of expansion after railroad earnings is therefore not so rapid. The northwestern railroad situation seems to be still the most immediate factor in the stock market as it has heavy grow to be still the most immediate factor in the stock market as it has heavy grow to be still the most immediate factor in the stock market as it has heavy grow to be still the most immediate factor in the stock market as it has heavy grow to be still the most immediate factor in the stock market as it has heavy grow to be still the most immediate factor in the stock professed as a supplied and important representation in the closure of the supplied and important representation in the professed in a large degree but the renewed weakness in stocks today caused some question of possible developments in the general situation is still

## Metal Markets.

New York, May 4.—The London tin market was decidedly easier with spot closing at £137 10s and futures at £133 10s. Locally the market is quiet with spot held at 29.95@30.00.

Copper was easier in London closing at £55 for spot and at £65 2s 6d for futures. Locally the situation shows little improvement and quotations are somewhat nominal. Lake and electrolytic are gooted at 15.00@15.25 and easting at 14.750

Chicago, May 4.—Fresh news of favorable tenor from the fall sown crop caused weakness in wheat today. At the close July was off ½%2c. Corn is down ½%2c. Oats are practically unchanged. Provisions are up 2½c to 10c. The wheat market opened weak, initial quotations on July being off ½c to 3c at 83½ to 83%. One influence at the start was a decline in the price of wheat at Liverpool. Another factor was heavy rain in the northwest where moisture, was generally needed. Receipts were generally light and buyers were readily found. A prediction of extreme cold weather brought out part of the demand. As a result of this buying the market soon became a trifle firmer. July advancing to 83%. The rally was only momentary, however, sentiment soon becoming bearish again. The main reason for the weak tone was a report by a Chicago crop expert claiming winter wheat in excellent condition. According to this authority the condition of wheat on May I was 91.1, and the
